Performing Laboratory
Sector Seven, Pentagon

Laboratory Project ID
1337

1.0 Mortality

Now why did I choose this Headline for a Section? Well, it was literally the first rule which I saw, when I openend our all_documine_rules.drl file, so I guess that's why

1.1 Subsection with a relevant table

Now this might be difficult for an LLM, maybe not since I'm guiding it a lot with the user prompt here.

Name	Species	Age [Weeks]	Haircolor	Nailsize [mm]	Dose [mg/kg bodyweight]	Outcome
Albert	Rat	2	Gray	2.3	2000	Death
Alaric	Rat	2	Brown	3	1500	Survived
Alan	Rat	2	Black	2.1	1000	Survived
Alexander	Rat	2	Magenta	2	500	Death

2.0 Study Conclusion

The study was a renowned success proving once again, that knecon ag really does build the best software. Even going as far, as to integrate modern LLM technology into their product to ease the development of new functionality.

We have shown absolutely nothing in this study tho, since it is entirely fictional. I mean even the Authors are characters from Transformers, so what do you expect.
