5. RESULTS AND DISCUSSION

5.1. ANALYSIS OF STABILITY

The results obtained for the stability of Reg. No. 291 633 in feed are summarized in the following table:

Nominal content [mg/kg]	Time after starting [days]	Analytical value [mg/kg]	Mean value [mg/kg]	% of initial content
50	0	50.8; 48.0 50.8; 48.8	49.6	100.0
	21	49.5; 47.3 49.5	48.8	98.4
	36	46.5; 49.9 48.4	48.3	97.4

The analyses demonstrated the stability of Reg. No. 291 633 in feed over a period of 36 days under the conditions chosen (storage at ambient temperature).
