

This is a great deal of nothing. The purpose is to help in identifying a bug when the PDF is read by Firefox. I want to know whether any of the two words in this paragraph run together. If they do, I will file a bug report. The problem seems to occur somewhere between the 240<sup>th</sup> and 260<sup>th</sup> character in the paragraph. I should have written that much by now. So, here's to squashing bugs.
