

Radio "fruit": AP states = kid indices; Opt = real export values

state 0 -> Opt[0] = JP ringo [U+308A U+3093 U+3054]

state 1 -> Opt[1] = Banane [selected]

state 2 -> Opt[2] = Cherry

Last changed field -> value:

Radio "shared": both buttons share Opt = "same"

state 0 -> "same"

state 1 -> "same"

Radio "veg" (parent has Opt but no /Kids)

state 0 -> Opt[0] = Carrot

state 1 -> Opt[1] = Potato [selected]

Checkbox "agree": AP state "0", Opt = "I Agree to terms"

agree

Change any option; the box shows that field's value. pdf.js shows the index, Acrobat the Opt value.
